Wind & Solar Renewable Energy Program

Members installing a small-scale (<20KW) renewable energy project should contact the Member Services Department for more information.

Kathy Robertson presents a \$900 check to Steve Esser for a ground source heat pump.

Heating and Cooling Rebates

Rebates are available on central air, mini-split systems, ground source and air source heat pumps.

Home Performance Assessments

Members will receive up to a 50% discount on the cost of a Home Performance Assessment, valued at \$300. A certified assessor will perform a full energy evaluation and recommend energy-saving home improvements.
