

Looking for a new way to
report your outage?

Introducing
outage texting.

Barron Electric Cooperative members who have a mobile phone equipped for sending/receiving text messages, and have that phone number listed on their Barron Electric account, can utilize outage texting. Members will receive automated responses to confirm that the outage has been received, and another text when power is restored.

Visit barronelectric.com and click on outage texting. Members can contact the Billing Department at 800-322-1008 to update their mobile phone number or complete the Update Billing Information form on our website.
